

# Black textures? Destination display has double lines?

## Do you encounter either of these bugs?

- Parts of your bus has black textures
- Destination display has double lines (see image below)

[unknown\[1\].png](#)  
Image with unknown type unknown

## How to fix it?

It's actually simple. In most cases you can despawn/remove the bus (you have to unset the schedule for that) and then spawn it in again. There used to be a penalty by BCS for this, but this no longer happens so you can do it without worries.
